

Submitter:

Tim Allen

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

My wife and I live 8 miles from the nearest town which doesn't even have the funding to field a full time officer 24/7. Now imagine an intruder on drugs enters our home brandishing a weapon, we exchange gun fire and at round 8 the intruder falls. Unfortunately he brought 2 friends with him.

YOU get to explain to my kids and community why she was raped and killed because YOU decided the number of rounds I was allowed to have in my gun magazine.

Now imagine the same scenario if my children were younger and still lived at home.

Evil is responsible for evil things, not the weapon. You're not impacting them, they just grab a magazine from across state lines, through an international mail delivery, 3D print or manufacture one, or simply choose a different tool. This rule does nothing but infringe on my right as an American to bear arms to defend myself, my family, and possibly even others.

Vote no on this, it is unconstitutional and will lose in court anyway. Put the money to better use. Vote no on HB3075.
