Michael Anderberg

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

After reading this it is clear that the people who decide to impose these policies have no idea what they are talking about. This process is redundant to what is already in place with background checks, and would only punish law abiding citizens that would be purchasing guns legally. It would be impossible for small government to process the applications in a timely manner and would be a waste of resources. I strongly disagree with this bill and oppose it being passed into law
