

Submitter: Michael Brainard

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3365

I'm am opposed to this bill because

- 1) Oregon schools are already at the bottom in Education and materials such as what are proposed here are taking away precious time from core classes such as math and English.
- 2) It appears the purpose of this bill is to make climate activist instead of educated students.
- 3) The study of climate change should be an elective for people who like to chase fairy tales
