House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

I have seen this state change in so many ways its not even funny!! These officials in our system have become so weak that the future is uncertain. I once thought that Oregon was one of the best states to live in but we turning into California and even worse with the people who are running our state. I ask these people that are making this decision if they even own a gun themselves?? Ask why a true hard working civilian would want a firearm? I could tell you that i chose them in defense for myself and my family, but not only as defense but a form to feed my family as you have rose the costs to everything we work for!! I can feed my family of of what god intended these magnificent creatures he gave for us not just to eat but to respect and keep on this earth that he built for us to see. All i see is evil in the men and women who are trying to impose all of the rules for thee but not for me. Rules are meant to be fought, and for the people who think we should put a limit to a magazine i ask you if you have a firearm and have to defend not only yourself but your family i ask what are you going to do with just 10 rounds? But yet again i ask if you intend to make it harder to posses a firearm why not use that same force for those who dont follow the laws that are already set. Why should we law abiding citizens be the ones to suffer and not those who don't follow. Our second amendment is our god given right to bear arms. Theres a reason we the people made these laws but these new ones are not by those who intend to good, instead its evil by you people who sit around thinking of new ways to collect money and take away from the hard working folk. I think you should ask the people who already have a firearm if theres something that should be changed why not ask those not the people in suits who know nothing but making decisions that affect thousands! These laws are misleading and just set it up for you as the state to take more money and pocket it or hide it. Our system is very corrupt and you people in office will bend over backwards for each other but not for civilian you dont see us as common folk we are not equal is another of you to look at us i oppose of this in many ways. The true people of Oregon will fight to the end and end this stupidity.
