

Submitter: Sadie Emond

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3444

Our communities in rural areas are struggling with funding, support services, and struggling to attract qualified staff to our areas. Our children are affected by these lack of support and resources. Many public schools are having to think outside the box to stay a float, and to stay open. Children with special needs are even greater impacted, as many local small charter schools don't have the resources, support, education program, and training to always meet the needs of the child.
