Committee: House Committee On Education

Measure, Appointment or Topic: HB3444

Charter schools have benefitted my family and three children tremendously over the last few years. It gives us an opportunity to do school as a family, as well as keep our morals and standards strong. All three of my children are easily distracted and overwhelmed by high stimuli, such as movement, lights, and sounds. They need a small, controlled environment to be able to learn commensurate as their peers. Sometimes our kids feel like they miss out on things because they are not in brick and mortar public school. Charter schools deserve to have the same funding as other education types. Please consider this bill to help support families who need to school differently
