

Submitter: Sue Craig

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3814

This bill is really hard to understand. Why would anyone want to prohibit clean water and clean surroundings when you are dealing with future food items. We need all the regulations we can get to keep our food industries following clean standards! I am a Mother, Grandmother, and Greatgrandmother. Clean water standards, and all food standards are a must for all our generations. Please drop this bill and do NOT pass on such deleterious standards.

Thank you for all your efforts to protect us.
