HB3075

The idea of forcing law abiding citizens to jump through additional hoops to be allowed to exercise our 2nd amendment right to purchase and carry a firearm is ludicrous. We don't punish drivers that obey the traffic laws because other drivers choose to drive intoxicated and cause damage and possibly deaths. If you want to reduce school shootings then provide mental help for all students. Provide drug treatment for addicts. Start in grade schools teaching kids how to problem solve with simple problems so that when they are older they have the skills necessary to cope with bigger problems.

The restrictions and requirements in this bill if the bill goes into effect are not capable of being implemented which strips me of my right to purchase a firearm for protection. Not to mention the additional costs involved with classes and permits prices many people out of being able to purchase a firearm for protection.

This bill does absolutely nothing to prevent felons or criminals from getting firearms. This bill, while written with good intentions is very poorly written with no caveats for off duty law enforcement officers, magazine restrictions that make all firearm magazines illegal essentially preventing all law abiding citizens from legally carrying their firearm.
