

Submitter: Brian Donne

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

HB3075 violates the 2nd amendment. The people who have written this bill know it but do not care. Limiting magazine capacity will not deter or stop mass shootings but it will immediately make thousands of law abiding citizens criminals.

Here Democrats look for a quick fix to stop mass shootings. The reality is their policies on mental health, rejection of police on campus and others have enabled more of these tragic events to unfold.

As a Country we know that more laws will not fix the problem. We have laws in place to protect citizens and our 2nd amendment rights. Adding a State requirement is only adding more costly bureaucracy and will not effect positive change Our current background check laws are not being followed. We have police, schools and other agencies not catching or responding to threats as they should. Let's follow and use our current laws instead needlessly layering on another law and an unconstitutional law at that.
