

Submitter: Robert Lindsey Jr

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

First and foremost a person should not have to have a financial burden to exercise a right. This bill puts an undue burden on the poorest and most vulnerable Oregonians. Oregonians that want to get a firearm for protection because they may live in a bad neighborhood or may live a long way from police help, like our counties in the eastern part of the state. Secondly magazines seldom come from a manufacturer with a "less than standard" 10 round capacity. 15, 20, and 30 round capacity are the standard. This bill also put the burden on the firearm own to prove the the standard capacity magazines they have were purchased before the ban went into effect. Lastly it goes against the Oregon constitution and the US constitution and it will do nothing but cost the state, counties and citizens a whole lot of money. Thank you
