House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

I am opposing this bill. I have all the right to purchase arms with out a permit. For my safety and the safety of others. The second amendment was written in such a way that our founding fathers knew it would be infringed appon and did not regulate the arms we bear knowing that advancement would happen in technology. Adding this bill will be costly to the public and not stop gun violence. Drugs are illegal and here I can go down to the corner and get some. Making a limit on magazine capacity will make most LEGAL fire arms owners criminals over night and cost us even more to comply with the unjust laws. I strongly urge the opposition of this bill.
