Care
Measure, Appointment or Topic: HB3761

I 100% support and encourage the Health Licensing Office to issue licenses to practice art therapy. Art is a powerful way for many people to process and heal emotions, traumas, conflict, pain.... It has just as much merit as other methodologies and modalities. People are complex and diverse and therefore therapeutic solutions need to be diverse. Making art therapy accessible and affordable is a key part to of comprehensive and compassionate care.

Thank you
