Measure, Appointment or Topic: HB3075

All of these ideas should be abolished from our voting system, innocent people shouldn't have to loose our right, our passion our protection and our love for firearms, because a group of people like gangs for instance do not respect other people or other people's rights in the first place. You guys want gun control, why don't you start at the problem! If a bad guy shoots someone just because or because of drugs, instead of sending them to prison, where they do not get better, euthanize instead, set examples and the problem will stop, I guarantee it!  
Do not Abolish the 2 Amendment!!  
It will bring on problems the governments not ready to handle!
