

Submitter: Patrick McKenna

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

Our founding fathers put the right to bear arms right under the right to free speech for a reason. Because they believed the importance of that right. They believed without the second amendment the other rights wouldn't be protected. And that the right would not be infringed on. Making any laws against law abiding citizens would only place the burden on them and would have no effect on the criminal persons. A criminal is a criminal because they do not follow the law to begin with. I am against placing any monetary price on people's god given right unconstitutional. Any government that are always trying to take away it's citizens God given right are defined as a tyrannical government. God bless
