

Submitter: Robert frisbee

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

Thank you for providing us with a clear and powerful audience to deal with a tragic and thus far everlasting panic. What can be worse than hundreds, yes hundreds of millions citizens of the USA, having their lives ended, broken, heart's broken, plans and dreams broken. The issue is guns, and the thousands of young people killed and wounded. Not in war, but shot in school, with no defense and no recourse. Starting in an Oregon high school but spreading across the country, and even worldwide events. Why are these senseless violence continuing, even increasing? No one is oregonized to create a more just world, distorted and hopeless children are getting one of the most powerful weapons available. The ease of finding these weapons, the ease and power of using them, their distorted thinking that they should peel away from their fear, shame, hurtfulness, and lack of love poisoned them to find thee powerful weapons, practice their evil, plan their terrible plans, and ruin not only their own lives, the lives of many children, the lives of teachers, the dreams or parents, with arms whose outcome is only evil.

Our society has refused to do anything to cut the steps that have to be available to create this evil. No other country, no other government, not other culture allow this to happen. Thousands have been murdered, millions have been heartbroken.

Can nothing be done? Everything can. Look at Australians marvelous steps. Look at many countries that do not allow the steps to the murder of children. And here in Oregon we have a momentous steps which, while not breaking the steps to these murders, can create barriers for much of the murders. And we, Citizens of Oregon, can show the world something can be done, and it can be done here in Oregon Please take the steps to make it much more difficult for psychotic children to obtain weapons designed and build for war. Please show our citizens and the world that humans are not this terrible to each other, and we can have better lives. Please support the people, the Courts, and our citizenry who have supported HB 3076, this important humanitarian shift in our laws. Thank you.
