

Submitter: Michael Zollin-Davis
On Behalf Of:
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3075

As an Oregon native and a Democrat voter I feel compelled to write this testimony voicing my concerns. This is my first ever testimony to a State or Federal body if government. That's how concerned I am.

This bill is not only unconstitutional(The 2nd amendment grants the right to bear arms and does not mention permits.), it will give law enforcement the ability to discriminate racially and financially against working class Oregonians through the proposed permit process under a false guise of "public safety."

Law enforcement is unreliable, unpredictable and has a low public trust across the country. Giving them the opportunity to violate the rights of the citizens across the state in the form of permits is counterproductive. This bill will never stop criminals from getting their hands on large capacity magazines, or unregistered firearms thus hurting law

abiding citizens' ability to defend themselves and putting them at a deadly disadvantage. On top of that you make law abiding citizens felons over night. How is that fair to those of us abiding to the laws over many years?

This bill will be and should be challenged in court almost immediately, wasting taxpayer dollars on a drawn out legal fight. Your constituents' hard earned money being used against their own interests is not what we vote for and is unacceptable. I and many other Oregonians are not okay with this. I am a younger male in a blue collar industry, the demographic that Democrats are currently struggling with. This will most certainly push more of this demographic away from the Democratic Party and out of our beloved home state. This is a bipartisan issue that should be looked at with common sense. I beg you toss this legislation in the trash and do something that is actually helpful and productive for Oregonians because this is a joke.
