HB3075

Dear Legislators, Please keep faith with the voters' decisions who expressed their concern over the proliferation of unregulated guns in our state. We are horrified by school shootings, the fact that our children have to have active shooter drills in school, that despite the voters' support for licensing and regulating gun dealers and requiring background checks, implementation has been halted and stalled . Please help restore trust in government and our democracy by honoring the vote. I am a former elected community college board member and a grandmother and am distressed by the inaction on this important CONSTITUTIONAL effort to make our communities safer.
