

Submitter: Jacob Cosler

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

This bill does not protect people from harm. All this bill does is affect law abiding citizens of the United States of America. Criminals do not follow such laws as a 10 round magazine ban. A prime example would be the "Glock switches" that criminals are still using in the thousands even though they are federally illegal under NFA ruling. With millions of standard capacity magazines and common sporting rifles such as an AR15's already in this state being owned by normally everyday citizens such as husbands, wife's, doctors, lawyers, and every other everyday person protected under the second amendment. All this bill will do is make a substantial percentage of the population criminals over night just so gangsters and thugs will have the upper hand on innocent and defenseless people.
