On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

As a mother of an elementary school child in Portland, I support a study that would provide hard data about gun licensing programs. Gun violence is a real problem, with families crushed by the deaths of loved ones. People killed, injured or impacted by gun violence have children, sisters, brothers, spouses, jobs, hobbies, community. We must do everything we can to improve protections and reduce harm, including making changes based on data at the licensing level.
