

Submitter: Susan Rosenthal

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2963

Please support the effort to subsidize e-bikes. These are an important part of the transportation landscape. E- bikes make it easier for older people and people with disabilities to ride bikes. They make biking more convenient, and allow people to extend the distance they travel. E-bikes are also important in the fight against climate change.
