

Submitter: William Floyd  
On Behalf Of: Myself  
Committee: House Committee On Judiciary  
Measure, Appointment or Topic: HB3075

I am 73 years, voting Democratic most of my life. I have been around firearms my whole life, shooting since I was 11 years old. It is in my opinion an overstep on the part of this measure. Large capacity magazines are in common use some 117 million in circulation in the US. These magazines have been around since the beginning of last century. They are not a recent innovation.

If I understand correctly, under this measure I would have to take classes to purchase new firearms? As it is, I am an RSO at a gun range (Douglas Ridge) as well as a CC holder in Clackamas county, having never had an accident gun-wise, and now at this late date I would have to jump through several hoops to exercise my 2nd amendment rights? I believe that this measure will be struck down once it reaches federal courts, which I am sure it will.

I am sure that my testimony is spitting in the wind at this point.
