House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This bill does nothing but infringe on my rights as a lawful citizen to have the ability to tool myself for self defense and recreational fun. You're wasting legislation time and public money (my tax dollars) making laws against me the tax payer. When you need to spend that money and time on fixing the problem. I keep hearing on the news is we need to fix mental health and violent crime. With Education in schools to help teachers and students. Mental health education in schools. Life and the world around us is just bigger by social media and the news. It's a lot these days for people we need to address it and help manage it. Mental health wellbeing and managing needs to be taught in schools. Life isn't getting any simpler. I feel this is where efforts should go to help people. Before they become lost and overwhelmed and full of hate for themselves and those around them to do acts of violence. Vote no on this bill. Vote to make a commute to teach and give today's overwhelmed society the tools to deal with this extremely complex life of today's word. Thanks for your time.
