Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

More gun laws are not needed in the State of Oregon. Why turn more good law abiding people into outlaws, as that's the only thing this bill will accomplish. Today's world has many guns that have standard capacities beyond 10 rounds. This is out of touch with reality, and will only put Oregon #1 in another losing category - just like homelessness, bad drugs, failing schools, little private industry, high taxes and other failed policies. Measure 114 was written poorly, and took advantage of well intentioned people to sway the vote on that measure. The fact that voters were led to believe that there wasn't already a background check system in place, is the only reason that Measure NARROWLY passed in the first place. Furthermore, this would be unconstitutional and naturally will be challenged. Ultimately this will only lead to more waste of the State's already stretched-thin funds. Oregon does not need more gun laws, just better enforcement of the laws already in place. For those reasons and more - our family strongly opposes this Bill and Measure.
