Jeff Martin

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This is an unnecessary bill which seems to be seeking to ram through a revised Measure 114 with additional restrictions to Oregon citizens while the original Measure is still under justice department review to determine if it's constitutional.

That should be enough for 3075 to die here and now but the personal matter is that we aren't held accountable to criminal standards by default. "Innocent until proven guilty" is supposed to be the rule of law. The great majority of Oregonians are law abiding citizens yet our state government is treating all gun owners as if we're criminals breaking laws daily. Murder is already a crime, limiting gun ownership or round count in the gun doesn't stop criminals. Why do you think more gun limitations are going to solve the crime you already aren't dealing with?

If you believe in America and it's founding fathers then you should already know you're violating the constitution and recent Supreme Court judgements. The right of the people shall NOT be infringed. Thank you.
