

Submitter: Aaron Bennion
On Behalf Of:
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3075

Why does Oregon need law abiding citizens to get a permit to purchase a firearm when we already have background checks for every purchase? Will this permit allow us to bypass future background checks? It will not. It's just a waste of time. The system probably has very little planning/implementation and will just waste every tax paying Oregonians money. California has a similar scheme in place. Is California safer than Oregon? I believe crime statistics will show that Oregon is far safer than California where guns are involved without any of California's laws in place.

If you're concerned with safety training why not teach firearm safety starting in Middle school or in High School and/or offer free safety training on the Oregon state website and advertise that.

"Large capacity Magazine" is a legal term. For us firearm owners a standard magazine is whatever is the most common capacity for that firearm. The FN PS-90 has a 50 round magazine. The Calico Weapon Systems, made in Oregon comes with either a 50 or 100 round magazine. AR-15 and AK pattern firearms typically have a 20 or 30 round magazine standard. Some, smaller guns have 6 round magazines. What do you do about the tens of thousands of these magazines that are already in the state? Again, punishing law abiding Oregonians. And was this copied directly from 114? Why the 2022 date? Are you coming to our homes to confiscate any magazine that doesn't have this stamp? And it being an affirmative defense, means that we, the people, have to prove we are innocent. It's not on the state to prove we are guilty. This whole law should be stricken down based on this allow. **WE ARE INNOCENT UNTIL PROVEN GUILTY.** It's not the other way around in America.

SB114 was locked up in the courts because it appeared to violate the Constitution so the sponsors just copied it and pasted it into this? No more forethought?

Any money that goes into SB114 or HB3075 would be better spend on Education in this state. In case you didn't know, Oregon is rated #44 out of 50 states in Education K-12. Every law you pass and dollar you spend that isn't going to increase our state's children's education is an absolute waste. Better educated people make better decisions, that includes safety.
