

Submitter: Hersey McBroom

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I highly oppose both house bill 3075 and measure 114. To start out with it's an infringement of our constitutional rights. Also will those willing to break a law follow this law? I highly doubt it because they are already willing to commit a heinous criminal act. Why don't we focus on punishing those whom commit crimes, and try to recognize and help those whom are suffering from mental issues. A firearm is just a tool, an object any object can be turned into a deadly weapon by those with bad intentions. Also why would you attempt to take away rights or even privileges of people whom have not committed a crime and possibly turn them into criminals by means of a feel good non proven bill or measure. It starts with limiting or restricting parts of a right or privilege in the name of so called safety and then it escalates to more and more rights and freedoms being restricted. Words can be dangerous and result in death as well so will the 1st ammendment continue to also be dissected into nothing? Let's focus on the real killer in our state drugs and fentanyl, perhaps that doesn't fit into the glory or feel good instant look at me voters I'm going to stop gun violence with a law category. Please consider the impacts that these types of regulations have on law abiding citizens compared to poor results they truly have on reducing shootings and gun violence.

Thank You.
