

Submitter: Brian Hall

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB2508

I strongly oppose this bill.

We do not need more information that can be accessed by a wider audience and risk the potential for a data breach. We should be protecting the privacy of students. Having this information local will limit any type of data breach.

Also, private school and homeschool students should not be included in any such database as it is not required by current Oregon law.
