Please vote yes on this bill. Hydro power is obviously renewable and is the most efficient of the "green" energies save for nuclear so the progressive liberals ought to be able to get behind this bill and it should receive strong bipartisan support from both sides of the aisle. Of course that is unless this green energy business is just that, a business, and has been about satisfying certain business interests that in turn funnel money into liberal campaign coffers. Here's the chance to prove us wrong Oregon Democrats.
