

Submitter:

Susan Palmiter

On Behalf Of:

Committee:

House Committee On Education

Measure, Appointment or Topic:

HB3360

Thank you chair and members of the committee for reading this testimony.

In Portland and over the state, we are seeing school buildings that are crumbling, school buildings that need better air conditioning and heating for the bigger swings in temperatures due to climate change, and school systems that are burdened by rising costs.

It makes an abundance of sense to use the kicker for school infrastructure costs. My children went to a school that was falling apart. They often had to sit on radiators and eat lunch in hallways because there wasn't enough space for them. It really degraded their high school experience. I don't wish that on any other student in Oregon.

Please pass this bill out of committee.

Susan Palmiter
