

Submitter: Michael Hale

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

Permitting a Constitutional right delegates it a privilege granted by the government and not an inherent right as intended by the founding fathers to restrict the power of the government. This harkens back to Jim Crow era voter suppression by placing unnecessary hurdles to practice our inherent, inalienable right to self-defense and security upon our person.

Furthermore a magazine ban will only further reduce the capacity of mine and my fellow law abiding citizens ability to defend ourselves. We cannot legislate morality and expect it to improve. Every tragedy that has befallen us has been the direct result of criminal behavior. 10 rounds in a pistol is reduced capacity and eliminates nearly all full-size pistols which goes against the intentions of the founding fathers and the spirit of the 2nd amendment.
