

Regarding HB 3075

First thought when reviewing the requirements of the bill is the infrastructure to implement the bill isn't in place and won't happen for the foreseeable future. That is limiting my rights as a gun owner. Considering the hurdles to jump through to obtain a gun are absurd. My rights are being taken away by a few select individuals that are hell bent on turning our country into a communist country. This bill only hurts the innocent and the thief could care less as they don't abide by the rules.
