

Submitter: Elaine Lavington

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB2063

I oppose HB 2063. Solar panels are an expensive form of energy that only works when the sun is shining. In the Pacific Northwest in the winter there is not much sunshine. Solar panels take up valuable land to grow crops. I hope you will oppose this bill.
