Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

I adamantly opposed this law. There has been no Financial impact statement attached. I also opposed it due to the fact that some years ago, I had an ex-boyfriend break into my house but again my head. He was not even legally supposed to have a gun due to the restraining order. When the officers came to my house and took a statement, that was the end of it. He was not arrested, and there were no consequences regarding his actions. In the state of Oregon, the problem isn't the gun laws. The problem is clearly enforcement of the gun laws. By allowing this law to proceed, all it does is take away my legal right to defend myself. It allows one more law for law abiding citizens to follow, and one more law for criminals to ignore!
