HB3075

This bill does nothing to combat crime, nothing. It doesn't shore up laws making criminals pay for their crimes, while using a gun or selling drugs. Or just plain robbing people.

Also, where did you come up with the idea criminals were going to take this class. Are you hand holding them there ? This is ridiculous.

There is no verbiage listed of how this makes Oregon a safe place, None because it doesn't.. law abiding citizens are already paying for background checks. We are paying for concealed carry permits. What data shows law abiding citizens shooting up a school? None. It is most likely a young boy, mentally unstable, the parent purchased the gun for the child. The parent pays not the rest of the state . People lie on the 4473. No one can check these records.

Another reason I don't need a non shooter telling me how it is, I grew up with guns. Never picked on up without permission. Took a rifle to school in the back window during hunting season . No one took it or messed with it. We had gun ranges under our schools. We belonged to trap clubs, knew how to clean, store and use all types of guns. We took hunters safety at school. What changed ? Someone who knows nothing about guns , decided to teach guns are bad. I have never had mine jump out of a safe and hurt someone. Never.

The amount a gun holds of bullets, doesn't matter. They can have more loaded up and on the ready. You aren't slowing a criminal down-only handicapping a legal gun holder.

My husband and I are both handicapped. We both have high capacity magazines in our legal carry guns. They are our protection from criminals, drug addicted and robbers. I am not putting my hands behind my back and letting them take advantage. Never. We come first.

Make new laws that make sense, like cinching up laws against criminals that use guns or a criminal if it isn't a felon, but uses a gun make him a felon that's permanent. There time in jail needs to be longer. Why Oregon likes to have unregistered sex offender's not registered, let criminals out of jail early or not at all? It's not job security. It's bull.

I offered Tina a chance to learn about guns, safety and shooting. In almost 3 years-not a peep from her. Why??
