

Testimonial Opposing Bill HB3838

Dear Committee,

My name is Cornel, and I am a provider of a small Adult Care Home business located in Happy Valley. I am writing to strongly oppose Bill HB3838, as it poses a significant threat to my business and countless others like mine.

As a small business owner, I work tirelessly to serve my residents and their families, support my employees, and contribute to my community. However, Bill HB3838 would create harm with excessive regulations, risk of not being able to defend my small business, increase costly compliance requirements, and overall cost that would make it even harder for small businesses to compete and survive. Unlike large corporations with vast resources, small businesses like mine operate on tight margins, and additional financial or regulatory burdens could force us to cut jobs, reduce services, or even shut down entirely.

Small businesses are the backbone of our local economy, providing jobs and fostering community growth. This Bill (HB3838) would threaten our ability to continue that. If this bill passes, it will not only hurt entrepreneurs like me but also the families and individuals who rely on us for employment and essential services!

I urge you to reject Bill HB3838 and consider policies that support—not hinder—small businesses! We need legislation that fosters economic growth, encourages entrepreneurship, and allows businesses like mine to thrive. Help us continue being the backbone of our local economy and being a positive addition to our community. Please stand with small business owners and oppose this harmful bill.

Sincerely,

Cornel
