HB3076

Dear Legislature Members,

I am writing this short passage in opposition to this bill being considered in the Oregon Legislature at present. The Right to Keep and Bear Arms is plainly delineated in the United States Constitution and there are already a large number of laws that I believe infringe on that right. This bill, purporting to begin a process to further erode those rights by making it more difficult for Federal Firearms License-holders is another overreach. Targeting the law-abiding citizenry in our state rather than the criminals is misguided and I would ask that you do not support this bill. In addition, without any idea of what it would cost at a time when our state is in difficult financial straights, I believe it should be withdrawn on that factor alone.

Respectfully,

Kevin W. Monk
