

Submitter: Cynthia Ruthel

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

My perception is that our legal right to bear arms is being attacked to take pressure off the real problem makers. These circumstances are out of our control. Now more than ever our gun rights should be upheld to strengthen our country and safety. It is our right to be safe and protect each other. Many people in our communities are not eating properly, families are being forced to feel inadequate financially and this bill will ensure that we cannot survive the big city expenses and dangers. Stop making our neighborhoods a revolving door with a population that we cannot trust. Stop selling us out! Who is that person that is hurting, miserable, scared, hungry and cold? We do not know anymore. Our guns are not the problem. I ask that you look deeper and address the real problems. We care, we want to help each other.
