

Submitter: Matthew Hicks

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2387

As a naturopathic doctor focused on treating mental health and a licensed psilocybin facilitator I can share that the prohibition on dual licensed practicing is confusing to clients and impares our ability to deliver effective care. That is why I support this bill that will end this prohibition. The lay public struggles to imagine how a trained professional can unlearn their skills simply to comply with one law at a time, especially where complementary skills and training would be of greater service to a client. The other components of this bill also have my support as means of improving upon this pioneering program.

Thank you
