Resources, and Water

Measure, Appointment or Topic: HB3786

I'm a doctoral student studying Oregon's marine systems at OSU. The our coastal waters are remarkable, and this state's institutions have maintained some of the most important long-term monitoring programs in the U.S. It is crucial that we maintain and expand such monitoring as global change intensifies. Without these kinds of programs, changes are only likely to be detected after it is too late to do anything about them.
