Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I disagree with every aspect of every despicable gun law these people are trying to push into place through devious, twisted, and illegal means. As a life long manufacture of firearms and accessories, I know more than most about statistics, safety, and law. Know that I will be suing over each and every issue. I've beat stares in court and I will do it with the state I was born in. This is no longer the state i call home.

Cordially
