

Submitter: Ethan Brown

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3076

HB3076 infringes on the principles of freedom and liberty by potentially paving the way for more government control over private transactions. A state licensing program will lead to increased surveillance and data collection on gun owners, raising concerns about privacy and the misuse of personal information. Instead of focusing on measures that target criminals, this bill risks penalizing responsible citizens and businesses, undermining their rights and freedoms in the process.
