| Measure, Appointment or Topic: | SB1076 |

Oregon rescues and sanctuaries have been regulated, registered, and fined while unregulated and uneducated breeders continue to contribute to overflowing shelters, preventable genetic diseases, and general overpopulation. Shelters especially have been overwhelmed and at capacity for the last few years without funding increases and this bill is needed to ensure population and genetic diseases can be controlled. Fees and standardization are an ethical need for supporting our beloved pets and preventing unnecessary pain and population issues.
