Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This bill has been promoted as common sense with absolutely no common sense going in to it. We've been told that large magazine bans will lower crime rate and lower suicide rates will there is absolutely no evidence supporting these claims. We've been told that permit requirements for guns will lower crime rates when the criminals that commit these violent gun crimes will never use the legal system to obtain guns. Why are law abiding citizens that are not out committing crimes the ones being punished and restricted because of criminals that don't follow the laws that are already in place? These laws are unconstitutional, illegal, very much against common sense and on top of that, will not prevent ANY crime as they don't target criminals, only law abiding citizens.

I urge everyone to vote no on this bill, this is a slippery slope that can only get worse and take more rights away from the people.

Shall not be infringed is not open to interpretation. This bill ONLY infringes.
