House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This measure is unconstitutional. Going directly against the 2nd amendment by both restricting firearms (magazine size) and requiring more fees. A State is unable to charge for rights that are directly given within the federal constitution (Murdock vs Pennsylvania 1943).

Also restricting magazine size is morally wrong. The Glock 19 arguably the most common pistol in America comes with a standard 15 round magazine. This bill would require many ccw holders and firearm owners to buy new magazines that limit their ability to protect themselves. Criminals will use higher capacity magazines without care for current law. This is just one example how the gov is willing to put law abiding citizens at a disadvantage. I want my wife to be able to defend herself effectively against a possible large male attacker. Please consult the constitution and strike this down. Also a small fraction more Oregonians who confined to a few cities/counties. Voted out the rest of this state on this by a mere few thousand votes. That is too close for a major bill like this. Now it is up to legislators and the courts to uphold the constitution.
