

HB 2050 3/18/2025

Informal format.

Until just now I haven't followed this important issue.

Deciding where to live after retiring from the military is very important and not easy. A big part of the decision not to retire in Oregon is based on how retirement is taxed. I think this is very common, not isolated. Without any data or other scientific process, I'm suggesting that the money gained by spending while living in Oregon would far exceed the Oregon taxation.

Thank you for your consideration.
