On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB2960

I am writing today in OPPOSITION to HB 2960. With plastics being bad for our landfills, it seems silly to prohibit plastic conversation. We need alternative ways to reuse plastic to try to keep as much out of our landfills as possible. Not to mention there is a real economic advantage to Oregon to allowing these facilities. They are solid, good paying jobs and brings revenue to the State. I urge a NO vote on this.
