House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This bill is wrong because it will truly make people less safe. There is little evidence that gun laws such as magazine restrictions actually reduce violence.

Measure 114 passed and the state had no. I mean none at all organization for permit process, classes and regulation. The same thing is happening here. There is no point of a bill that has nothing behind it but control over citizens.

What can I do when seconds matter and police are literally not showing up for 30 minutes?

Making permits and extra steps to purchase a gun won't matter when there are people stealing from gun stores. All it does is make it harder for people of a lower economic class to protect themselves in neighborhoods that need the most protection. If the state can't make a permit process or safety course, there is no way of trusting the state with passing this bill.
