

Submitter: Mary Addams

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2067

I support HB 2067 because battery powered leaf blowers are less polluting and are quieter. I had to move from my apartment on Willamette St in Eugene because gas powered leaf blowers would wake me up very early in the morning. But more urgent than the horrible noise they create, they're SO polluting to our air!

They're probably really unhealthy for the landscapers to use because they're inhaling those fumes and I don't know how sound cancelling their ear protection is.
