Committee: House Committee On Education

Measure, Appointment or Topic: HB3568

I think this is a great idea. Using our local natural resources to give the students in our schools the opportunity to enjoy some amazing fresh seafood that is easily and locally available to Coastal States like our own. This may encourage some of the students to seek employment opportunities in their lives in the Oregon Fisheries or at least Coastal communities. It's it's much better for our students to be eating local and supporting local and being made of aware of our local Seafood industry.
