

Submitter: Ruth Dallas

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB2067

I hope legislators will back this simple step for an easy way to reduce greenhouse gasses in our communities while at the same time reducing noise pollution. Fighting climate change is hard but a bill like this one can make a big reduction in pollution without costing a lot of money. Let's at least do this one thing to improve our environment. Thank you.
